Jobs Experience

Web Frontend Developer
8Capita, Singapore (Remote)   *April 2017 - October 2017*

My main responsibility was shipping and building website as client requested. I was using standard web development stack in my day to day development such as HTML, CSS, Javascript, JQuery and also Squarespace for some projects.

Mobile Developer
Bibimapp, Singapore (Remote)   *October 2017 - February 2020*

I was working in this project alone as mobile developer. Technology that we chose was React Natve because we want a multi platform techology that can help us ship app faster to both App Store and Play Store. I also used Redux as architecture for this project.

IOS Developer
Binar Academy, Yogyakarta   *May 2018 - October 2018*

This was my first job as native ios developer. I was working in small team consist of three people. We used Swift as our chosen language and ReSwift as our architecture. As I began to work there, the app still not realease yet but after three month we finally released it to App Store.

IOS Developer
Tokopedia, Jakarta   *October 2018 - February 2020*

I was part of home and recommendation tribe here. My day to day work was shipping features for our weakly release, wrote unit test, reviewed peer's code, attended meeting and many more. I rewrote Tokopedia ios homepage from react native to native ios and wrote recommendation widget that can be placed in any screen. We used cutting edge technologies in our daily work like AsyncDisplayKit (Texture), IGListkit, RxSwift and MVVM to solved our problems.

Web Frontend Developer
CircoPay, Singapore (Remote)   *October 2019 - February 2020*

I was working on company dashboard in this project and I also created homepage for circo-pay.com. We used VueJS.

Education Experience

Bachelor Degree
Gadjah Mada Univeristy
2011 - 2016

Major in Electronic and Instrumentation.
